PROFILE

Versatile technology professional with over five years of experience in front-end web development and IT education. Skilled in building responsive, user-focused applications using modern frameworks and best development practices.

Brings a strong foundation in both technical implementation and instructional delivery, with the ability to translate complex concepts into clear, practical solutions. Experienced in collaborating with cross-functional teams, integrating APIs, and developing scalable, maintainable systems.

Known for a detail-oriented approach, adaptability to evolving technologies, and a commitment to continuous learning and professional growth.

EXPERIENCE

IT FACULTY, LICEO DE CAGAYAN UNIVERSITY — JULY 2025 - PRESENT

Delivered instruction in core IT subjects, including Object-Oriented Programming, Platform Technologies, and Living in the IT Era, focusing on practical and industry-relevant skills. Also served as a student organization adviser, mentoring student leaders, and acted as a training coordinator responsible for organizing workshops and professional development programs to enhance both faculty and student competencies.

Front-end Engineer, ORQ.ai — April 2024 - May 2025

Worked on developing and implementing front-end features and application workflows, ensuring alignment with product requirements and user experience goals. Collaborated closely with cross-functional teams to deliver new functionalities, conducted code reviews to maintain quality standards, and contributed to the integration of APIs and scalable front-end architecture. Also established and maintained unit testing processes to support application reliability.

Software Engineer, Nalagenetics IND — August 2022 - April 2024

Led front-end development efforts, including designing application architecture and implementing features and workflows. Ensured code quality through regular reviews and adherence to development standards, while collaborating with team members to introduce new functionalities. Integrated APIs, optimized performance, and established testing strategies, particularly unit testing, to support maintainable and scalable systems.

Web Developer, Nathan & Nathan — May 2022 - July 2022

Developed application features based on client requirements, designed and implemented UI components, and integrated backend APIs while enforcing business logic. Maintained clean and efficient code by following best practices and coding standards, ensuring project requirements were delivered accurately and efficiently.

Front-end Developer, Muuvment — Feb 2020 - 2022

Built responsive web and mobile applications for both Android and iOS platforms, ensuring technical feasibility of UI/UX designs. Collaborated with teams to implement features, integrated APIs, and established testing workflows, including end-to-end testing, to ensure application performance and reliability.

Front-End Developer, HSI — May 2019 - May 2022

Worked on developing and implementing front-end features and application workflows, ensuring alignment with product requirements and user experience goals. Collaborated closely with cross-functional teams to deliver new functionalities, conducted code reviews to maintain quality standards, and contributed to the integration of APIs and scalable front-end architecture. Also established and maintained unit testing processes to support application reliability.

EDUCATION

Master of Science in Information Technology (Ongoing)

Liceo de Cagayan University, Cagayan de Oro City
September 2024 – Present

Bachelor of Science in Information Technology

Bukidnon State University – Alubijid Campus
June 2015 – April 2019

- Award: Best IT Student (2018–2019)
- Relevant Coursework: Web Development, Programming, Database

Administration

SKILLS

HTML5, SCSS, Javascript, TypeScript, Svelte, Angular, Bootstrap, Material UI, Tailwind, Unit Testing, E2E Testing, Android, Git, Vue, NuxtJS, NodeJS, MongoDB, Hono-API, Playwright

PROJECTS

HSI ATTENDANCE - ANDROID

An android application that allows the employee to manage their time log for their work. Allows employees to clock-in/clock-out, see their time logs, update information, scan QR for attendance, etc..

Tech Stack: Android, Kotlin, AndroidStudio, GooglePlay

Link: <https://play.google.com/store/apps/details?id=com.r.hsiattendance>

POLLIFY - WEB

A web-based application designed to facilitate the creation, management, and participation in online polls and voting activities. The platform enables users to easily generate customizable polls, distribute them to a target audience, and collect real-time responses in a secure and efficient manner.

Tech Stack: Angular, Typescript, Tailwind, MongoDB, Hono-API
